

Door Knocking with MiniVan

MiniVan is a tool for canvassing efforts that will contain voter lists and allows for entry of voter contact results.

Getting Started

- Download the MiniVan app
- Create an "ActionID" account (email address and password)
 - [Instructions for creating an ActionID](#)
- Enter the list number given to you by your organizing lead. (Example #: 33733568-84028)

Working in MiniVan

- Your assigned list will come up sorted by households.
- Tap an address to see the voter's name, age, and party affiliation. (D, R or U for unaffiliated)
- Tap the name to see the canvassing [Script](#).
- Next to [Script](#) are [Details](#), which show voter info, including their polling location.
- Next to [Details](#) is [Notes](#), should you care to make any.
- Next to [Notes](#) is [History](#).
- Mark "YES" if the voter signs the petition (if circulating a petition)
- On the map view, the little bubbles with numbers tell you how many targeted voters are in a household.
- Use the swipe shortcut to mark not home.
 - Hold and tap on an Android phone
 - Note: This function may change to another shortcut on a different campaign

Sync the Data by tapping the menu button and then Sync.

- Sync often if you are working with a partner. The list will reflect where your partner has been. You each must have your own account for this to work.
- Sync as you go and when finished.

Other Features from the Menu:

- [Maps](#) show you the printed map or a satellite map with your current location. It will show you houses that are done.
- [People](#) will give you an alphabetical list of everyone on the list.

Important

- Don't go to a door where you don't feel comfortable.
- You should leave literature behind, but **do not leave anything on a mailbox** as that is a federal offense.
- If people are interested in getting involved, be sure to collect their contact information.
